| Energy performance certificate (EPC) | | |
|--|---------------------|--|
| 3 Manleys Cottages Langford Lane Pen Elm TAUNTON TA2 6NZ | Energy rating | Valid until: 8 November 2033 Certificate number: 2921-9811-8611-3392-0111 |
| Property type | Semi-detached house | |
| Total floor area | 123 square metres | |

Rules on letting this property

Properties can be let if they have an energy rating from A to E.

You can read <u>guidance for landlords on the regulations and exemptions</u> (<u>https://www.gov.uk/guidance/domestic-private-rented-property-minimum-energy-efficiency-standard-landlord-guidance</u>).

Energy rating and score

This property's current energy rating is C. It has the potential to be B.

<u>See how to improve this property's energy</u> <u>efficiency</u>.

| Score | Energy rating | | Current | Potential |
|-------|---------------|---|---------|-----------|
| 92+ | Α | | | |
| 81-91 | В | | | 86 B |
| 69-80 | С | | 73 C | |
| 55-68 | D | | | |
| 39-54 | E | Ξ | | |
| 21-38 | | F | | |
| 1-20 | | G | | |

The graph shows this property's current and potential energy rating.

Properties get a rating from A (best) to G (worst) and a score. The better the rating and score, the lower your energy bills are likely to be.

For properties in England and Wales:

the average energy rating is D the average energy score is 60

Breakdown of property's energy performance

Features in this property

Features get a rating from very good to very poor, based on how energy efficient they are. Ratings are not based on how well features work or their condition.

Assumed ratings are based on the property's age and type. They are used for features the assessor could not inspect.

| Feature | Description | Rating |
|----------------------|---|-----------|
| Wall | Cavity wall, filled cavity | Average |
| Roof | Pitched, 100 mm loft insulation | Average |
| Window | Fully double glazed | Average |
| Main heating | Room heaters, mains gas | Average |
| Main heating control | No thermostatic control of room temperature | Poor |
| Hot water | Gas multipoint | Average |
| Lighting | Low energy lighting in 86% of fixed outlets | Very good |
| Floor | Solid, no insulation (assumed) | N/A |
| Secondary heating | Room heaters, mains gas | N/A |

Low and zero carbon energy sources

Low and zero carbon energy sources release very little or no CO2. Installing these sources may help reduce energy bills as well as cutting carbon emissions. The following low or zero carbon energy sources are installed in this property:

Solar photovoltaics

Primary energy use

The primary energy use for this property per year is 166 kilowatt hours per square metre (kWh/m2).

How this affects your energy bills

An average household would need to spend **£2,716 per year on heating, hot water and lighting** in this property. These costs usually make up the majority of your energy bills.

You could **save £964 per year** if you complete the suggested steps for improving this property's energy rating.

This is **based on average costs in 2023** when this EPC was created. People living at the property may use different amounts of energy for heating, hot water and lighting.

Heating this property

Estimated energy needed in this property is:

- 11,691 kWh per year for heating
- 1,697 kWh per year for hot water

| Impact on the enviro | nment | This property produces | 3.7 tonnes of CO2 | |
|---|-----------------|--|-------------------|--|
| This property's current enviro rating is D. It has the potentia | | This property's potential production | 1.6 tonnes of CO2 | |
| Properties get a rating from A (best) to G (worst) on how much carbon dioxide (CO2) they produce each year. CO2 harms the environment. | | You could improve this property's CO2 emissions by making the suggested changes. This will help to protect the environment. | | |
| Carbon emissions | | These ratings are based on assumptions about average occupancy and energy use. People living at the property may use different | | |
| An average household produces | 6 tonnes of CO2 | amounts of energy. | | |

Changes you could make

| Step | Typical installation cost | Typical yearly saving |
|---------------------------------------|---------------------------|-----------------------|
| 1. Increase loft insulation to 270 mm | £100 - £350 | £105 |
| 2. Floor insulation (solid floor) | £4,000 - £6,000 | £137 |
| 3. Condensing boiler | £3,000 - £7,000 | £631 |
| 4. Solar water heating | £4,000 - £6,000 | £92 |

Help paying for energy improvements

You might be able to get a grant from the <u>Boiler Upgrade Scheme (https://www.gov.uk/apply-boiler-upgrade-scheme)</u>. This will help you buy a more efficient, low carbon heating system for this property.

Who to contact about this certificate

Contacting the assessor

If you're unhappy about your property's energy assessment or certificate, you can complain to the assessor who created it.

| Assessor's name | Layla Girone-Maddocks |
|-----------------|---------------------------|
| Telephone | 07756274642 |
| Email | epc@gibbinsrichards.co.uk |

Contacting the accreditation scheme

If you're still unhappy after contacting the assessor, you should contact the assessor's accreditation scheme.

| Accreditation scheme | ECMK | |
|----------------------|-----------------|--|
| Assessor's ID | ECMK303734 | |
| Telephone | 0333 123 1418 | |
| Email | info@ecmk.co.uk | |

About this assessment
